## LIST OF GRADUATES FROM LOCAL SCHOOLS

The list of pupils who will be graduated from the various grammar schools of San Mateo county at the end of the present semester, as announced by Miss Pansy Jewett Abbott, county superintendent of schools, is a long one, and a most gratifying one.

The following boys and girls of the Jefferson district have passed the tests and will be graduated from the grammar schools:

Albert Bertucci, Emily Bauer, Oscar Del Sarto, Richard Varni, Ethel Johns, Orlando Cecchi, Louis Mangiante, Lester Olcese, Elsa Calcagno, Angelo Paul Petrini, Mary Gaggero, Gino Paoli, Marguerite Mueller, Alvin Cobleigh, Emma Grissler, Doris Herrick, William Prentice, Al Brady, Elma Viotti, Vincent Aiello, Mildred Franklin, Anthony Modica, Florence Rancatore, Edna Stulhammer, Delilah Valdivia, Grace Miller, Elizabeth Moser, Eleitta Williams, Pauline Sundermann, Premo Baldacci, Georgina C. Bennett, Wilber Cairns, Milton Carson, Craig Chase, Arthur Crocker, Edna Culbertson, Amelia Fontana, Aaron Gassin, Leo Ginsti, Harold Guthrie, Lillian Hauptle, Ivy Joy, Laura Like, Glenvin Meadows, Ethel Metcalf, Hazel Milo, John Muller, Rosemary Reed, Verna Schmidt, Hugh Smith, William Sherwood, Malcolm Stotts, Jeanette Taggart, Madeline Von Hofen, Frank Walker, Henry Wohler, Florence Kennedy, Matilda Barsotti, Norma Toso, Alice Silicani, Louise Siemund, Esther Durbin, Lida Casentini, Marie Ciarlo, Diva Conci, Liberty Matter, Elsie Dallara, Milo Newell, Angelo Mozzini, George Olmo, Marguerite Warren, Thomas Spencer, Lois Herrick, Thelma Prentice, Arthur De La Cruz, Mary Centinolo, Paul Rauschan, Joe Moran, Ruth Moran, Charles Johnson, Amelia Peterson, Eleanor Boyle, Evelyn Hanschen, John Verducci, Pauline Aiello, Andres Vuneo, Esther Strulhammer, Carmen Bautista, Miriam Bentley, Cecil Cameron, Edith Casanova, Robert Cochran, Angelo Crudo, Melvin Eisenberg, Virginia Freeman, Shirley Gilley, Herman Gowe, Anna Hicks, Martha Johnson, Tom Liggett, Mary Lucia, Nick Medo, Carl Nelson, Charles Nelsson, Richard Perada, Benjamin Roth, Donald Smith, Irene Smith, Dorothy Squier, Ray Sweeney, Nellie Van Housden, Herman Vujevich, Mary Walton, Eunice Wolfe.

## CHILDRENS' DAY PROGRAM AT M. E. CHURCH SUNDAY

"Childrens' Day" will be oserved at the Daly City Methodist church next Sunday evening at 8 o'clock. A special program has been prepared by the children of the Sunday school.

"The Enemy" was the subject of the pastor last Sunday evening. "The enemy is not the other country, but hate in the breasts of the people," said Mr. McClintic. He made a plea against compulsory military drill in schools.

The Ladies Aid met last Saturday for a social hour. A delightful surprise was given Mrs. McClintic.

There will be a food sale at the church on June 12.

### NUMBER OF IMPORTANT SALES MADE BY LOCAL REALTOR

A number of real estate deals of considerable magnitude have been successful consummate recently by J. T. Casey, who reports a brisk demand for property in this section. Recently the Belli Vista Ranch was sold for a sum said to be in the neighborhood of $45,000. It was sold at public auction by Mr. Casey, who had been appointed receiver by Judge Buck of the Superior Court. This property is located about six miles south of Colma.

Highway Heights subdivision, south of Colma, has also been sold by Mr. Casey for a sum in the neighborhood of $60,000. This property will be subdivided into small acreage.

### SCHOOL CHILDREN ELOPE; ARE MARRIED AT SANTA CRUZ

Samuel A. McKeown, aged 19, and Grace Frances Wheeler, aged 16, were married at Santa Cruz last Tuesday morning, they having gone to that city without the knowledge of their parents, who knew nothing of the trip until the announcement was made that the youthful couple had been united in marriage.

Miss Wheeler is a pupil at Galileo high school, while Samuel McKeown is a Sophomore in the Affiliated Colleges, where he is studying dentistry.

Immediately upon learning of the elopement and marriage of the young couple, the bride's parents instituted proceeding for annulment of the marriage.

## GRADUATION OF PIONEER CLASS OF JEFFERSON HIGH

The "Pioneer" class, the first class to complete four full years of work in our high school, graduated last Friday before a respectful and admiring audience of friends and well wishers which packed the auditorium.

These young people are making history. Their records in the industrial world and in the institutions of higher learning will prove the value of our local high school. Seven of the fourteen graduates intend to enter the Junior College at San Mateo, and seven will enter the business world direct.

The quality of the speaking was excellent and inspirational. Dr. Breitweiser, of the University of California, the main speaker of the evening, was entertaining and uplifting, while he brought a message to the graduates in a convincing manner.

Our own speakers, Rosa Bauer and Albert Saarinen, were a source of pride to all interested.

The music was furnished entirely by the members of the school, under the direction of Miss Potter.

The graduates were:

Rosa Bauer, Winston Barghorn, Joseph Drucker, Harold Fischer, Edward Goldkuhl, Edna Hooton, Louis Plansky, Mildred Ross, Albert Saarinen, Victor Saarinen, Anita Varni, Lawrence Vireno, Martha Worst, Rae Wolfe.

The program follows:

Prayer—Father Donohoe, St. Maximus church.

"Women in the Modern World"—Rosa Bauer.

"Yosemite Baby" — Elizabeth Newell, Mable Vireno, Mae Varni, Josephine Jensen.

"The Hey-Day of Youth" — Dr. Breitweiser.

"Where My Caravan Has Rested;" "Come to the Fair"—Gifford Teel.

"The Fruits of Science"—Albert Saarinen.

Presentation of Graduates—Neil O. Best, Principal.

Presentation of Diplomas — Mrs. Stella Jensen, Clerk of the Board; Mr. Adolph Gehringer, President of the Board.

"Poet and Peasant Overture"—High School Orchestra, directed by Miss Effie Potter.

### POPULAR BUSINESS FIRM ENLARGING ITS QUARTERS

The business of the Thomas Jefferson Cleaning Works has grown to such an extent that enlarged quarters have been found necessary, work on the new addition to the building opposite the post office having been under way for some time. Next Monday the new quarters will have been completed and occupied by this enterprising firm, where they will be able to attend to a greater volume of business than ever. The new quarters will be well fitted with all the latest equipment used in dyeing and cleaning, and in the future no order will be too large or too small for this enterprising firm to handle. An invitation is extended to the people of Daly City and vicinity to inspsect the new plant on Monday, the day of the opening.

### ENTERTAIN AT HOSPITAL

The Crocker Minstrel Show, composed of members of Crocker Chapter No. 382, Order of the Eastern Star, entertained the soldiers at Letterman Hospital on Wednesday evening, June 2, the program presented being most thoroughly enjoyed by all present. Among the artists who took part in the performance were Mrs. Halkey, Mrs. Parkman, Mrs. Batz, Mrs. McKee, Mrs. Griesmer, Lillie Nielson, S. Riddell, Angus Campbell, George Murray, W. Nelson.

### STORK SHOWER

Last Tuesday the ladies of the Daly City Methodist church gave a surprise stork shower to Mrs. Stanley McClintic, who was very much pleased with the many useful and dainty things she received. The church was tastefully decorated in pink and blue. A pleasant time and lovely refreshments was enjoyed by all. Among those who helped to make the affair a succcess were: Mrs. Leonard McKee, Mrs. Harry McKee, Mrs. Sidney King, Mrs. L. Brown, Mrs. F. J. Summerkamp, Mrs. O. Ginsberg, Mrs. Steadman, Mrs. Sturtevant, Mrs. Hicks, Mrs. Rampe, Mrs. J. McKay, Mrs. Stewart, Mrs. B. R. Cashion, Mrs. Meeth, Mrs. E. Stanley Williams, Mrs. P. F. Welch, Miss Edna Minaberry.

**South City to Install Stop System**

Because of the success of the arterial highway stop system since its establishment in Burlingame, it is said Chief of Police Belloni of South San Francisco is preparing plans to establish a similar system in that city. Following an investigation by Belloni, he will recommend to the trustees the installation of the stop system.

## FOLLOWS EMANCIPATOR

Milton R. Moskow, twelve-year-old San Francisco schoolboy who since the age of five has patterned his life after that of Abraham Lincoln, aspires to occupy the White House some day as his hero did. He has been nominated as a candidate for the American Youth Award established by the directors of the Sesqui-Centennial International Exposition, held in Philadelphia from June 1 to December 1 in celebration of 150 years of American Independence. Under the plan of the American Youth Award and the American Teacher Award, each state will select a boy and a girl and a woman teacher who best represent American ideals, and they will be given trips to Philadelphia and to Washington, where they will receive medals from President Coolidge.

## MAN FATALLY INJURED WHEN STRUCK BY CAR

Leopold Elsbach, retired business man of Los Angeles, who had been living at 2378 Jackson street, San Francisco, for the past ten days, died Tuesday morning at the South San Francisco hospital from injuries received when he was struck down on Sunday by a street car near the Home of Peace cemetery, at Lawndale.

Elsbach's skull was fractured, his right leg was broken in two places, and in addition he suffered internal injuries when he was struck by the car. He was taken to the hospital in an unconscious condition and remained in a state of coma until his death.

According to witnesses of the unfortunate accident, Mr. Elsbach was crossing the street and walked directly in front of a southbound street car.

Elsbach's widow arrived Tuesday from the south to take charge of the body. He was 52 years of age.

## NEW LIST OF COUNTY TRIAL JURORS DRAWN

The new list of trial jurors for the Superior Court of this county, drawn by Superior Judge George H. Buck last Tuesday, has been anounced as follows:

Henry Jenkins, San Mateo.
Frank W. Roeckner, San Mateo.
Mrs. Ethel Gravestock, Palo Alto.
Alexius F. Friman, Daly City.
Jessie N. Murphy, Burlingame.
Mary Daly, Burlingame.
Nancy Probasco, Burlingame.
M. J. Knox, Redwood City.
Frederick L. Ford, Daly City.
Wellington E. Orton, Menlo Park.
Effie Clara Mahany, San Carlos.
Ruth L. aBrrett, Belmont.
Mrs. Adelaide Butts, Redwood City.
Ellen Biber, Burlingame.
Elizabeth H. O'Brien, San Mateo.
Caroline Farless, Burlingame.
Anna S. Dixon, Burlingame.
Stella L. Jensen, Colma.
Mrs. Mary J. Cobb, Redwood City.
Lucille T. Emmons, Burlingame.
Frank E. Preble, Colma.
Mrs. Minnie Ross, Half Moon Bay.
Josephine Olmo, Colma.
Ralph E. Williams, Sr., La Honda.
Elizabeth Meehan, San Bruno.

**Associated Firemen Will Dance**

The Associated Firemen of San Mateo County will hold their second annual dance in the Casino at Pacific City next Saturday, June 5. Dell's eight piece orchestra will furnish the music. If you like to dance, come and dance with the firemen. The committee has provided a safe parking place for all machines. This dance, from all appearances, will be the one big event of the season.

## SAN FRANCISCO PORT EXTENSION IS URGED

San Francisco was urged to extend its harbor into San Mateo county by the Menlo Park Chamber of Commerce at its last meeting in a resolution addressed to the San Francisco board of supervisors.

J. W. Pembroke, former assemblyman, who introduced the resolution, said that San Francisco's industrial development has been restricted by reason of her wharfage facilities being limited by law to the area now under control of the State Harbor Commission. He cited the probable advantage of extension to the southward.

The extension of the Belt Line railroad from San Francisco to the Dumbarton bridge so as to give all westbound railroads access to San Francisco, was discussed prior to the adoption of the resolution. With the Belt Line thus extended it was stated San Francisco could more easily extend its harbor and industrial development to the south.

The extended harbor should be under the jurisdiction of San Francisco's municipal government and without the legal and administrative restrictions found in the present harbor commission statutes, it was contended.

## USE OF COP'S WHISTLE PROVES VERY COSTLY

As a result of clearing traffic for themselves with the use of a policeman's whistle while they traveled down El Camino Real last Saturday evening on the first lap of a week end trip, Robert Contreras and Jack Jurish, of San Francisco, paid $100 and $25, respectively, when they appeared before Judge Gaffey of Burlingame.

While Jurish blew the police whistle long and lustily, Contreras drove from side to side of the highway, causing many motorists to leave the highway. One of the motorists who objected to this method of progress, however, swore to a warrant for the arrest of the men, and they will probably not attempt such tactics again in the near future.

**Building Permits For Week**

City Clerk B. C. Ross reports the following building permits for the past week:

Horace Fellows, 64 Vista Grande avenue, four rooms and garage.

N. M. Wegner, 375 Crocker avenue, remodeling.

R. G. Wahl, 363 Woodrow street, five rooms and garage.

R. Mullen, 538 San Diego avenue, four rooms and garage.

## LOCAL EAGLES LEAVING FOR ANNUAL CONVENTION

The Fraternal Order of Eagles will open their annual convention in Yosemite Valley, June 6, with official headquarters at the "Lodge."

Today a caravan of Eagles from Daly City and Colma leave in their automobiles to journey by the way of the beautiful scenic route, Merced and Wawona.

The caravan will spend an evening at Merced, leaving early the following morning for the valley.

Besides the regular order of business, there will be many interesting events, one in particular, the competitive drilling of drum corps, in which Daly City is very much interested.

The Eagles' drum corps, champions of the state of California, having won first prize in San Jose last year, have confidence in repeating the victory in Yosemite this year. And their many friends in Daly City and Colma are banking upon their again winning the championship, and wish them every success in their efforts.

Among those who are leaving with the caravan are: Mr. and Mrs. W. J. Sweeney, Mr. and Mrs. Peter Pavlos, Ed. Heim, Mrs. Lang and son, Miss M. Bozzano, Miss K. Schoning, Mr. and Mrs. F. A. Collins, George Connolly, E. Nessier, George Heim, S. Pfeiffer, T. Parmasino, A. Milano, D. Schreiber, W. B. Wright, Ed Bozzano, J. Vigna, J. Bannard, J. Bonalanza, Wm. Boldger, J. Boldger, M. Pava, Joe Costello, J. Reardon, Wm. Ottoboni, A. Pribula, L. Zerga and Otto A. Schramm.

## HALF MOON BAY WILL CELEBRATE JULY 4TH

Tentative plans for the big Fourth of July celebration to be held in Half Moon Bay were outlined at a recent meeting of the Half Moon May Volunteer Fire Department, under whose auspices the affair will be held.

It is expected that the celebration will eclipse all previous efforts at Half Moon Bay, which has a reputation for celebrations of the Fourth of July, large crowds from other sections ususally being in attendance.

The opening feature of the festival will be a parade. All communities, civic organizations and lodges of San Mateo county will be invited to enter floats and delegations in the parade, which promises to be the largest and most pretentious ever held in Half Moon Bay. A program of sporting events will be prepared. Among the events already decided upon are a greased pole contest, a greased pig contest, bicycle races, three-legged races for boys and men, 100-yard dashes for boys and men, and special features for the women. There will be dancing, an excellent orchesta having already been secured.

### CALIFORNIA RANKS HIGH IN GOVERNMENTAL COST

California, with annual expenditures in excess of $75,000,000, ranks fourth highest among the states of the Union in governmental costs, according to a comparative statement made public by State Treasurer Chas. G. Johnson.

Basing his statement on state tabulations and financial statistics just received from the federal census bureau, Treasurer Johnson places New York at the top of the list with a total of $161,755,161. Illinois in second place, reported a yearly total of $121,104,880, and Pennsylvania came third with expense totaling $93,893,391.

California, fourth highest, reported the cost of operating its state government at $75,332,566. Johnson stated that the government cost tables were for the year 1924, this being the latest comparative data available.

The grand total of expenditures, representing the combined cost of maintaining governments of the forty-eight states for the twelve-month period, was fixed at $1,506,302,429.

In per capita governmental cost payments, California was placed sixth highest by the federal bureau. The rate for this state was given as $15.66 for each resident, as compared to an average in the country at large of $9.60.

Per capita expenditures in the five states exceeding California's rate were gives as follows: Nevada $27.38; North Dakota, $25.71; Kansas, $22.59; Delaware, $17.52; Wyoming, $17.43.

### MUST HAVE WRITTEN PERMIT BEFORE BUILDING CAMP FIRE

Motorists must have written permits to build camp fires on private property in San Mateo county, it has been announced by District Fire Warden Bert Werder. The permits must be obtained from the property owner, who may issue permits after having applied for the privilege of permitting camp fires on his premises.

## CAPITALISTS PLAN NEW BAY RESORT

Tentative plans for development of a new Pacific City on the bay beach at San Mateo are under way, with Los Angeles and San Mateo county capital considering financing of the project, according to word that comes from San Mateo.

The plan includes purchase of the amusement properties inside the grounds of the present beach resort, now closed, and their removal to a location southeast along the shore in the lee of Coyote Point.

The principal difficulty at the present site has been the cold winds that blow across the beach in the afternoon, and it is claimed the proposed new location is free from this difficulty.

The beach has a gentle curve and is sheltered by the high and heavily wooded point. The water is free from other objections, including proximity to sewer outlets, which have retarded the popularity of Pacific City as a bathing resort, it was stated by those interested in the new development project.

Representatives of Los Angeles capitalists have already inspected the new site and have considered purchase of facilities at Pacific City, such as the scenic railway, dance pavilion and other properties which may be removed to the proposed new site.

It is announced that extension of San Mateo streets through new tracts soon to be developed in East San Mateo will give splendid approaches to the new site, heretofore isolated. Establishment of a bus line over Peninsular avenue would provide ample transportation for patrons of the beach resort, arriving by train and street car from San Francisco.

Those interested locally in the new project declare that the plans are but tentative as yet, and that it is still too early to predict definite developments. The possibilities of the site are declared to be highly attractive, however, the spot having been known to San Mateo residents for many years as ideal for picnic purposes.

With the exception of a rocky beach the place would provide ideal facilities for a swimming resort and general amusement park, it is stated. Improvement of the beach is contemplated, and the new site would be immediately improved with a monster swimming tank, according to plans given consideration by interested capital.

## MATSON IS DEFENDANT IN BANKRUPTCY CASE

Walter J. Matson, of San Mateo, recently acquitted on charges of grand larceny in connection with alleged shortages of the Honolulu Plantation Company, of which he was secretary, has been made defendant in an involuntary petition in bankruptcy in San Francisco. W. M. Johnson, receiver for the defunct Hale Company, with which Matson was formerly connected, filed the petition, alleging that Matson owes the company more than $24,000 for money loaned to the San Mateo man over a period of several years. It is charged that a transfer of valuable securities by Matson at the time of his accusation by officials of the plantation company constituted an act of bankruptcy. Matson's creditors do not exceed twelve in number, according to the petition.

## GIRL SUCCUMBS TO BURNS FROM LAMP

Miss Drothy Lewis, of Woodside, died early Saturday morning at the San Mateo County Community hospital as a result of burns received Tuesday of last week at the ranch of her uncle and aunt, Mr. and Mrs. A. J. Davis, of Woodside, where the girl made her home.

The accident occurred when alcohol, spilled from a lamp, ignited the woolen sweater worn by the child. Flames from the lamp were inhaled when she screamed for assistance. Flaming alcohol spread about the room and ignited her skirts when the girl attempted to extinguish the fire with a bucket of water. Mrs. Davis, rushing to the assistance of the screaming girl, smothered the flames with a blanket. Complications resulting from her injuries brought death.

### GOVERNMENT IS BUYING SAN MATEO COUNTY SPUDS

The United States government is buying all of the potatoes grown in the Rockaway Beach section for use of the army and navy. The potatoes grown in that section are considered to be the best found anywhere and where several carloads are grown. The entire crop was purchased by the government at fancy prices, it is said.

## PLANS BEING MADE FOR W. C. T. U. CONVENTION

One of the outstanding features of the National Woman's Christian Temperance Union convention to be held in Los Angels, September 26 to October 2, will be a demonstration in color by the state presidents, featuring the membership gains of the year. Reports already received by Mrs. Frances P. Parks of Evanston, Ills., national corresponding secretary, show that the gain will more than double the gain last year, which was 40,000. Mrs. Anna Marden DeYo, of San Francisco, corresponding secretary of the W. C. T. U. of California, has already exhausted the supply of shields on which are to be written the names of those who have obtained ten new members and has sent a hurry call for more.

There will be a big children's demonstration on Sunday afternoon, September 25, with a large group of children, representing the million new members that have joined the Loyal Temeperance Legion or children's organization, during the year.

This will be a "white convention," all officers, delegates and visitors being asked to dress in white, symbolizing the purpose of the organization to continue its work for world prohibition, world purity and world peace.

Mrs. Addie Garwood Estes, of Berkeley, state president of the W. C. T. U. of California; Mrs. Anna A. Pettit, of Fresno, vice-president; Mrs. Anna Marden DeYo, of San Francisco, state corresponding secretary and national director of institutes; Mrs. Emilie K. Skoe, of Petaluma, state recording secretary; Mrs. Ina A. Orvis of Madera, state treasurer; Miss Elizabeth Hewett of Berkeley, state Young People's Branch secretary, and Miss Helen McLean, of Alameda, editor of the "White Ribbon Ensign," are ex officio members of the national convention. Other delegates will be elected, one delegate representing each 500 members in the state.

## SPECIAL COMMITTEE FAVORS LEASING OF MUSCLE SHOALS

After two months of investigation and special hearings the joint congressional commitee on Muscle Shoals has recomended to congress that the government's big power plant on the Tennessee river be leased to an associated group of Southern power companies for a term of fifty years. Under this plan the government would receive $517,648,00 and be relieved of all chance of loss. Final decision in the matter is now up to congress, with President Coolidge and Secretary Hoover favoring a leasing plan in preference to government operation.

Home brewers who are proud of their product usually swallow their pride.

## NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Jefferson Union High School District, San Mateo County, State of California, at 8:00 P. M. on the 19th day of June, 1926, for the erection and completion of a Manual Arts Building on the High School site in Daly City, San Mateo County, State of California, according to plans and specifications prepared for the same by W. H. Weeks, Architect, the authorized Architect employed by the Board.

Bids will be received as follows:

A price on the erection and completion of Manual Arts Building.

Plans and specifications may be seen at the offices of the Architect, W. H. Weeks, 369 Pine Street, San Francisco, or 1924 Broadway, Oakland, California; or at the office of the Principal of the High School in Daly City, California.

All bids should be presented on bid forms furnished by the Architect. Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than 5 per cent of the amount bid, made payable to the President of the Board of Trustees of the Jefferson Union High School District, which shall be forfeited to the said school district should the contractor, if awarded the work, fail to sign the contract within five (5) days after award and to furnish the required surety bonds.

Each bid must be delivered in sealed envelope and addressed to "Clerk of the Board of Trustees," and be endorsed: "PROPOSAL FOR NEW MANUAL ARTS BUILDING."

The Board reserves the right to reject any and all bids.

(Signed) STELLA L. JENSEN,
Clerk of Board of Trustees, Jefferson Union High School District.

# *Young At 60, Or Old At 40? Diet Decides*

Women are as old or as young as their state of health. A woman may be young at sixty years or old at forty. It all depends on her physical well-being.

Youth and beauty have a foundation in sound health. And food is easily the most important item in health. In giving consideration to the subjects of diet and beauty, women should not forget the food essentials that make for the preservation of teeth, hair, figure and complexion.

Blame for round shoulders, flat chest and poor teeth among women is due in large measure to faulty diet, or, specifically, to a lack of lime and phosphorus. Milk, or evaporated milk, which is simply cow's milk with 60 per cent of the water taken away, is especially rich in lime.

Because of the concentration of evaporated milk, which is regulated by government standards, it is of

double the richness of ordinary market milk, as is shown in the following table:

| Ordinary Milk. | | |
|---|---|---|
| Fat | 3.5 to 4 | per cent |
| Sugar (lactose) | 4.5 to 4.75 | per cent |
| Proteins | 3.5 to 4 | per cent |
| Minerals | .7 to .75 | per cent |
| **Evaporated Milk.** | | |
| Fat | 7.8 to 8.2 | per cent |
| Sugar (lactose) | 9.5 to 10 | per cent |
| Proteins | 7.5 to 8.2 | per cent |
| Minerals | 1.4 to 1.6 | per cent |

A quart of milk a day for adults is recommended by doctors not only because of its high mineral content, but for the reasons that it helps keep the digestive tract in proper condition, strengthens the body to resist disease, and gives proper balance to the diet.

Salads also play an important part in the dietary. Some sort of a salad, lettuce, tomato, fresh fruit, cabbage or vegetable, should be eaten at least once a day. Neither is the daily menu complete without a generous quality of coarse, leafy vegetables, valuable for their high vitamin content. Fruit juices also have very beneficial properties.

If a woman follows out the rules of diet, birthdays to her will be nothing more than an excuse for a celebration.

# *Purity of Milk Protected Now By Scientists*

By KATHRYN ST. JOHN

Careful housewives constantly make it a point to ascertain the quality of each item that goes on their tables. Preparing food for the family is an extremely important job, for the proper selection and preparation of foods make in a large measure for the health and happiness of the family.

Milk is the most nearly perfect food, but it is a very delicate one as well. The keeping qualities of milk are slight. Danger from contamination is ever present. Evaporated milk, which is double rich because of the removal of 60 per cent of the water, is science's solution to these conditions.

Safeguarding evaporated milk is worked out as perfectly as man's ingenuity has been able to make the process. From cow to can, the milk which goes into the evaporated product is watched every step of the way.

Cows of the dairy herds are guarded with constant care and are subjected to regular inspections by veterinary surgeons. Herds are carefully groomed, and their yards and barns are kept scrupulously clean, as are all utensils. Milk condenseries are located in the heart of the big dairy regions to facilitate speedy handling, for this is essential if the milk is to be canned at "its moment of maturity." Canvas-covered trucks haul the milk to market, thus protecting the product from contamination on the way. Arriving at the condensery, the milk goes through tests for acidity, sediment, flavor and butterfat content before it is accepted.

Experts watch the progress of the milk through every step of its way. It goes into the evaporating machine; to the homogenizer, which breaks up the fat globules so that the milk may be easily digested by the consumer; by way of the almost human filling machine into sterilized cans; then into the sterilizer, where the cans are surrounded by steam and boiling water, destroying any possible bacteria. Inspectors handle the product as the last step to see that the canning job has been perfectly done. Labeling and packing follow. The housewife obtains the milk as fresh and sweet as

## SIDELIGHTS

By Marcy B. Darnall

Proceedings against a Virginia manufacturing firm charged with misrepresenting the quality of its umbrella handles were dismissed by the Federal Trades Commission. The owners of umbrellas seldom keep them long, anyway, so the quality of the handles makes very little difference.

An insane negro carried an armfull of brickbats to the tower of a Birmingham church and proceeded to throw them at passersby below. He said he wanted to preach a sermon and had taken this means of attracting a congregation, but the police didn't even give him a chance to take up a collection.

Scientific investigations show that salesmen get better results when wearing plain neckties, while dotted ties tend to repel the customer. A contemporary suggests that the dotted tie possibly diverts the buyer's attention from the dotted line.

Judge Gore of Nashville told an offender that he was sorry that he could not impose a life sentence for a violation of the prohibition law, but added: "I have no sympathy for the law, and less for the person who violates it."

The Courier-Herald, of Dublin, Georgia, has a poor opinion of a prominent member of the state's delegation in Washington, and suggests his political epitaph, as follows: "Here lies a man who had the greatest appetite for office seeking and the smallest capacity for office filling in all the history of the state."

All the noise made recently regarding the new 3.75 per cent "medicinal beer" appears to have been a false alarm. It is declared that the stuff makes a man sick before it makes him drunk, thus taking the joy out of the kick when it finally does arrive.

It is said that insanity is increasing. Probably due to the Polish trouble, which has placed a terrific strain upon proofreaders.

# HORN ABUSED BY SOME MOTORISTS

## Sound of Warning Is of Value When Approaching a Crossroad.

Never before in the history of the automobile has there been so much abuse of the automobile horn. Horns are better sounding and more reliable than they ever were, yet this appears to be of no advantage in regard to their use.

Unquestionably motorists are becoming a bit vain over the noise their horns make, because experience shows that the horn button is always overworked where cars are thickest and where horning is least necessary. That is because each driver is trying to outdo the other. Some one horns and the first thing you know they are all doing it. Conversely, because the audience along the highway is so scant by comparison the horn is silenced. No one on the road would jump a foot when it is sounded.

This business of burning the headlights in daytime during a long tour as a means of wasting some of the electric current so as not to overheat the battery would be unnecessary. The horn motor offers a means of wasting current, and, at the same time, of using it to good advantage. Headlights in the daytime are useless because their rays cannot be seen until one is looking straight into the reflectors. A warning then is unnecessary.

Horning at all the curves, crossroads, school houses, upon passing other cars and before reaching the crest of a steep hill where another car may be approaching on the wrong side of the road, furnishes an excellent way of not only forestalling damage to the battery but to the whole car as well—not forgetting the occupants.

### Word of Caution.

In horning generously, however, a word of caution is appropriate. The careful driver never keeps his horn blowing constantly while rounding a curve or approaching a crossroad. To do so would be deafening himself to the sound of another horn which may be blown as a warning to him. In such cases the effect is the same as though neither driver sounded a warning; and the results are much more serious, because when a driver has given a warning he assumes that he has paved his way to safety and immediately puts on more steam.

When the cars suddenly appear face to face the drivers are caught off their guard. Their excessive surprise may occasion them to act less sensibly than if caught in the usual predicament as a result of not horning at all. The solution is to horn intermittently.

This matter of intermittent horning is of particular value when approaching a blind alley or a crossroad in the wake of another car. Many drivers have a habit of assuming that if the driver of the car ahead horns at a crossing that is sufficient warning for both. But experience proves that it is not. The motorist coming out of the side road hears one horn and naturally assumes there is but one car coming. He proceeds to cross the main road and precipitates a collision.

### Coming From Side Road.

The man coming on from a side road seldom horns because he feels that he should give the right of way (not according to law, but for safety's sake) to the faster traffic of the highway. If two or more highway cars, therefore, begin relying upon the horning of the machine in the lead there is bound to be trouble sooner or later.

In the city horning is becoming a nuisance. A motorist who recently put up over night at a downtown hotel suffered insomnia because of the incessant horning of cars at the corner.

A motorist may think the pedestrian plays no important part in his motoring, but just the same the length of time he must wait at a crossing depends largely upon how long it takes for the pedestrian to cross. A blast of the horn may get the pedestrian "traffic dizzy" and so prolong the agony. There is a time to horn and a time to remain silent; and it only requires a little headwork to differentiate between them.

## Best Driving Code Quite Simple One

Have you ever stopped to consider the signal code of the average driver? It is a very simple code and not difficult to acquire. It follows:

To indicate a right turn—stick out your hand.

To indicate a left turn—stick out your hand.

To indicate that you are about to stop—stick out your hand.

To indicate that you are about to back—stick out your hand.

To emphasize your conversation with your fellow passenger—stick out your hand.

To flick the ashes off your cigar—stick out your hand.

This is the generally accepted code. Under the circumstances, it is remarkable that accidents are not more frequent.

## Windshield Wiper With Semi-Automatic Device

My car had only the ordinary windshield wiper operated by hand. This was rather inconvenient and tiresome, so I rigged up a semi-automatic attachment which proved entirely satisfactory. I took about six inches of spring from an old shade roller and fastened it to the right side of the windshield. Then I fastened the other end to the knob of the wiper, regulating the tension so that the wiper would be pulled over quickly. A pulley in the upper left-hand corner, through which is run a stout cord fastened to the knob, completes the device. When it rains I loop one end of the string around my hand, and when the windshield needs wiping a downward sweep of my hand pulls the wiper over and when I let go the spring pulls it back again. The cost was only ten cents for the pulley.—Dr. E. W. Henke, Newark, N. J., in Popular Mechanics Magazine.

Semi-Automatic Windshield Wiper Which Does the Work Automatically and Costs Only a Few Cents.

## Safe Conduct on Roads Is Founded on Courtesy

"It is almost axiomatic," writes the manager of a traffic bureau, "that safe conduct on highways is founded on courtesy.

"A million detailed traffic rules cannot cover up that fact. There is no substitute for courtesy anywhere, least of all on a crowded highway."

There used to be more of it, this traffic man says, than there is now.

"That was in the days when automobiles were new and few. It was natural then for drivers to treat each other courteously, as they would do in meeting neighbors on the street, or touching elbows with them at theater or church.

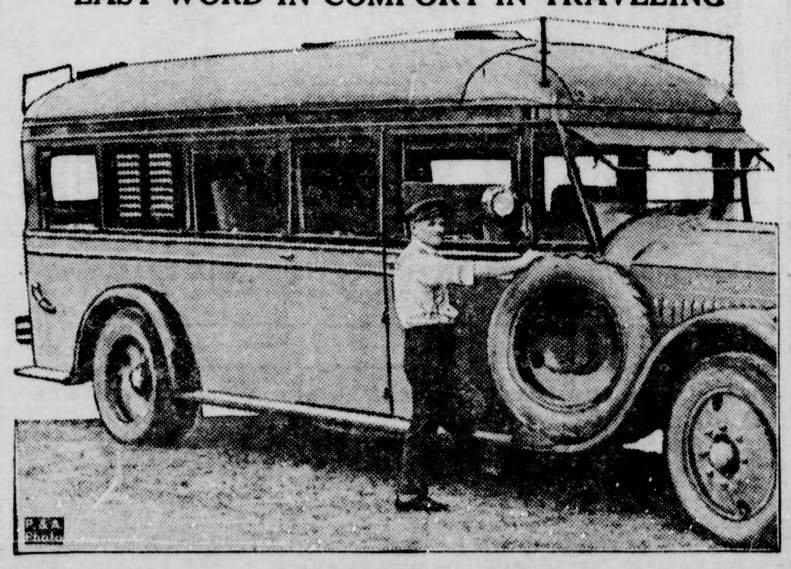
"But with the increase of traffic pressure on space and nerves they have lost that fine old spirit of mutual accommodation.

"It may be harder now not merely because there are so many more cars on the road, but because 'all kinds of people are driving them.'

"There may be a larger proportion of boors and thugs behind steering wheels than there were in the primitive traffic days of ten to fifteen years ago. Yet it is still true that courtesy is the great solvent.

"Gentlemanly — and ladylike — conduct is contagious, and tends to multiply itself on the road as it does anywhere else."

## LAST WORD IN COMFORT IN TRAVELING



Ralph C. Caravan, retired business man from Chicago, who has been touring the country in this $20,000 de luxe car. This parlor car has a kitchen, tile bath, dining room and sleeping accommodations, and is the last word in comfort in traveling. Photograph shows the house on wheels.

# CALIFORNIA NEWS BRIEFS

## STOCK CHEATER TO BE BLOCKED

The citizens of El Monte, Los Angeles county, have devised a practical program to protect themselves from stock swindlers, it was announced a short time ago, by State Corporaztion Commissioner Edwin M. Daugherty, of Sacramento, who recommended the plan to the rest of California municipalities. The unique co-operative plan at El Monte, Daugherty said, simply involves calling up the chamber of commerce and reporting each time a stock salesman appears with securities for sale. Then the vigilance committee gets busy, asks the salesman or broker to explain his proposition and orders him to get out of town if his proposal is risky or without merit.

United States Attorney George J. Hatfield, at the last session of the federal grand jury, secured the indictment of another receiver of stolen army equipment. One of the activities of the leeches who operate in the vicinity of military reservations is a traffic in purloined government property. These persons, including certain proprietors of clothing stores and other places of business catering to men in the service near army posts, have been buying valuable articles of clothing, blankets, etc., from soldiers for trifling sums. The most nefarious of the practice of these Shylocks is the inducement to steal offered by this trade. The present case will be brought to trial at the earliest possible time with a view to effecting a summary abatement of this illegal traffic with its attendant bad influence upon susceptible soldiers.

That there shall be no further drowning fatalities off Death Rock at Wright's beach, where three young San Francisco boys were recently swept to their death is now assured. Not only will warning signs be placed about the spot, but the Petaluma Elks had a meeting and decided to cause the use of dynamite that shall so shatter the approach to the rock that it will be impossible for people to get up onto it. Some years ago Ray Corliss, wealthy hatchery man of Peatluma and a member of the Petaluma Elks, lost his life while fishing off the rock and as a memorial to him and to the others who have since met a similar fate the Elks have taken the matter of shattering the rock in hand.

Mr. and Mrs. Robert Braden, C. L. Hartwell and George B. McDougall, state officials, visited the historic ground at Fort Ross, in Sonoma county, recently, where the Russians landed in 1812, built a church and a fort, ran up a stockade and planted an apple orchard. This property is now owned by the State of California and the state has restored the old landmark. McDougall, who is state architect, outlined further restoration work for which an appropriation of $2,500 was granted by the last legislature. On July 4 the second service in a hundred years will be held in the church. The Rev. Father D. Sakovich, of Trinity Russian cathedral San Francisco will officiate.

Setting forth that "such illegal businesses are now being conducted in our city in great numbers, and are a menace to the property owners and to public welfare, and tend to lower the moral standard of our community," a petition signed by 100 citizens of Tracy, San Joaquin county, has been presented to the Tracy city council, asking that the board "close or abate all houses of prostitution, all blind pigs selling liquor and all gambling places within the city."

Before an audience of 4,000 persons mostly hikers, carpeting the slopes of the natural amphitheater near West Point on Mount Tamalpais, May 23, Rip Van Winkle, came to life and his shaggy beard danced in the breeze that swept in from the sea. "Rip Van Winkle" was the thirteenth play staged on the grassy slope of the mountain by the Mountain Players and was acclaimed the best by many who have made the pilgrimage to the mountain play for many years.

Pointing out that southern California, with 2,000,000 population has had but one congressman on the job, with the Boulder dam legislation before the national body, Robert M. Clarke, candidate for the United States Senate, issued a statement recently. He discussed the postponement of the subject and declared that this action at Washington is "discouraging though not disheartening."

Owing to the efficiency of its workmen, its superpower and available raw materials the Pacific coast is soon destined to become a great manufacturing area, urged B. M. Rastall of the Californians, Inc., in a speech before the San Joaquin valley supervisors and the San Joaquin valley secretaries in session at Bakersfield.

Officials of the Mare Island Navy yard have been advised to start work on Submarine Divisions 18 and 11, early in July. Appropriation of nearly a million dollars has been made for this work, it is stated, but yard officials have been awaiting the official orders, which have now arrived.

Northern California and particularly Sierraville, Sierra county, is out with the claim that it harbors the tallest and the heaviest boy of 17 years in the country. The boy is Norman Dolley, 17 last October. He weighs 208 pounds and stands 6 feet 6 inches

A bond issue of $115,500 to erect a new union high school at Davis, carried at a special election by a vote of more than eight to one.

A fire fanned by a fifty-mile-an-hour gale at Truckee, Nevada county, recently, practically gutted the Rex hotel, a hostelry here since the early seventies. The loss is estimated at $20,000.

Two warehouses of the Ellis J. Levy company, at Willows, Glenn county, were almost totally destroyed by flames recently. The loss estimated at nearly $20,000 was partially covered by insurance.

V. P. Richards, one of the old-time residents of Butte county, celebrated the eighty-fifth anniversary of his birthday recently, in the home he has lived in for nearly all the time since he came to Butte county in 1869.

It is interesting to note that figures of the United States Department of Agriculture for 1925 show California with less than 2 per cent of the crop acreage of the entire country, produced crops having a total farm value of nearly $470,000,000.

A new use for gopher tails, in which gophers have no interest, has been found in the Imperial valley The tails are becoming legal tender in many valley towns, where a bounty of 10 cents a tail is paid by the county horticultural commission.

California will send the largest delegation to the Eucharistic Congress to be held in Chicago from June 20 to June 24, of any Pacific Coast state, according to Frank A. McCarthy, general chairman of the Young Men's Institute pilgrimage.

The San Diego Realty Board, contender for the 1927 state convention of the California Real Estate association, has announced its withdrawal in favor of the Santa Monica Bay District Realty Board. The convention will be held in October of next year.

A protest against "crook" plays which advance criminals as heroes and portray police officers either as villians or blundering dunces has been sent to Hollywood movie producers in a resolution passed by the California Central Counties' Better Films Board, an organization of club women in northern California.

The Native Sons of the Golden West at their recent forty-ninth Grand Parlor in Santa Rosa adopted two resolutions calling opon all members of the order to actively sponsor the protection and wise use of the timber and other valuable natural resources of the state, and to join each year in the national observance of American Forest week.

Southern California as a whole and Los Angeles in particular will be brought prominently before the real estate world at the nineteenth annual convention of the National Association of Real Estate Boards at Tulsa, Oklahoma, opening June 7, when of the eighteen California men scheduled to deliver addresses, papers and reports, twelve will be from the southland.

Wasco was host to all Kern county celebrating a civic dream come true. That dream became a fact April 22, when the Wasco water system, first project of the Wasco public utility district, filled its mains to give the city a domestic water supply and adequate protection against fire. The system, which cost $75,000 is now supplying 350 consumers 400,000 gallons daily.

Fully 25 per cent of California high school students are devotees to Lady Nicotine at the present time, or five times as many as used tobacco twenty years ago, it was estimated by Dr. Herbert R. Stolz, state supervisor of physical education, who declared that cigarette smoking by modern high school girls has helped to bring about the surprising increase of the last two decades.

The completion of the 3,000,000-gallon reinforced concrete water reservoir, situated on the hills west of Newport Beach, recently marked another step in the development of municipal improvements in Orange county. The huge tank, one of the largest city water reservoirs in southern California, is a part of the $350,000 municipal water system now under construction in the city of Newport Beach.

Offer of a deed of gift of Pixley's grove, pioneer picnic grounds of twenty acres near Lodi, has been made to the city of Lodi, provided Lodi Post, American Legion, will guarantee to improve it for a long term of years. W. G. Micke, prominent fruit grower, who makes the offer, asks that the post bore a well, install electric lighting, playgrounds and other equipment. The post has named a committee to investigate.

Investigators and inspectors of all state departments hereafter will be permitted to hold such offices only after qualifying through civil service examinations, and all employes now holding positions of this nature under temporary authorization must appear for examination, David J. Reese, state civil service commissioner, announced. Detectives and special officers heretofore have been exempt from civil service regulations.

Before a crowd of 3,500 people, including editors from all over the state, comprising the membership of the California Press association, the Klamath River bridge, last link in the Redwood highway, famous coast travel artery, was dedicated a short time ago. Governor Friend W. Richardson gave the dedication address, dedicating the bridge to the memory of the late Assemblyman G. H. Douglas, who died suddenly in Sacramento March 27, 1923, shortly after addressing a legislative committee on the appropriation for the bridge ov[illegible] the

# THE AMERICAN LEGION

## WARNS WOMANHOOD AGAINST PACIFISTS

"I warn the womanhood of the country not to marry any man who would subscribe to the 'slacker pledge'—If you do, I give you warning now, you will live to regret it!"

Thus, addressing the student body of Indiana university, a co-educational institution, National Commander John R. McQuigg of the American Legion, began an unrelenting campaign against the "ultra-pacifist movement in America, especially as it exists in schools and colleges."

The Legion leader declared: "Anyone who could be contemptible enough to swear to the 'no-more-war' oath, is unworthy to live in any country, under any flag, anywhere.

"I cannot understand the state of mind of the pacifist, the man who receives every benefit a nation has to confer and who will not defend that nation when it has need for defense. A government of all is entitled to the services of all. In accepting an obligation of citizenship, a man accepts the duties of citizenship, and one of those duties is the duty of defending the government in its time of need.

"The American Legion can render no greater service to the country than to fight the insidious undermining of her national defense by ultra-pacifist movement," Commander McQuigg said. Referring to the reserve officers' training corps, which is authorized as a basic feature of the one army plan of 1920 and which has been attacked by radical pacifists, Commander McQuigg declared, "Any attempt to undermine an article of that plan will be resisted vigorously."

The Legion recently created a national defense committee to combat the ultra-pacifist movement. Gen. L. R. Gignilliat of Culver military academy and a past department commander of the Indiana department of the Legion, is chairman of the committee. Other members are Vilas Whaley of Racine, Wis., and Howard Savage of Chicago.

After Commander McQuigg delivered his address, co-eds of the university launched a campaign to combat pacifism among the men students.

## *Fraudulent "Guardians" Keep Investigators Busy*

Guardians of incompetent World war veterans who misappropriate or misuse funds paid them by the government for their wards are rapidly being found out and removed by the joint efforts of the United States Veterans' bureau and the American Legion. An investigation carried out by the Legion representative disclosed the following typical case which shows how one guardian disposed of more than $10,000 "in behalf of his ward."

One bicycle, $52.75; one rowboat, oars and towing boat, including repairs, $60; one canoe, paddles, etc., $108.75; set of sails for canoe, $24; one mast set for canoe, $4; one repair kit and book on boating, $5.50; two cushions for canoe, $4.50; one seat for canoe, $2.35; one steering wheel for canoe, $2.50; duck trousers and hat, $9; purchase of Christmas presents in 1921, $40; wireless telephone set, $50; Christmas presents in 1922, $30; radio set, $113; Christmas presents in 1923, $50; Christmas presents in 1924, $45; travel, $1,152; 136 visits to theater at $9.90 a visit, $1,346.40; purchase of camp site, $700.

A new guardian was appointed and action started to recover as much as possible for the ward, as soon as the Legion and bureau learned the facts.

## *Guard Now on Duty at Unknown Soldier's Tomb*

A soldier in the field uniform worn during the World war, with light pack, steel helmet, wrapped puttees and fixed bayonet, now marches post, day in and day out, winter and summer, before the tomb of the Unknown Soldier at Arlington National cemetery.

This permanent military guard at the Unknown's tomb was secured through the advocacy of the American Legion during the past three years.

Secretary of War Dwight F. Davis ordered the guard placed over the tomb early in April. The Legion pointed out that tourists and visitors at the shrine had taken away souvenirs. It is their hope that a proper reverence for the symbol will be engendered by the presence of the guard at the tomb.

## *Must Renew Policies Before July Second*

A powerful argument in favor of veterans immediately renewing their war-time insurance was voiced by National Commander John R. McQuigg of the American Legion at New York City recently. The Legion chief said:

"Our disabled men are now dying off at a rate of about 4,000 a year. Of the great army of 4,500,000 who carried government insurance during the World war, only ten per cent have retained their policies."

All policies must, under the law, be renewed before July 2 this year

## SOMETHING FOR NOTHING

Commenting on the general desire for tax reduction, the Stockton, California, Record says:

"Stamping a ballot opposite a bond issue proposal is the easiest thing in the world to do. It is when the tax bill comes that the shoe pinches. People have grown used to the fact that everything in their indvidual lives costs a great deal more money than it used to, but not to the idea that community effort, state and county expenses are also bound to be higher. The demand for lewor taxes, and promises to reduce taxes go right along with the insistent cries for improvements that a few years ago were considered luxuries, but today are necessities. The people should not delude themselves into thinking that modern improvements are to be had for old time taxes."

The tax bill will grow or diminish in proportion as the people understand that they can not get something for nothing, even from the public treasury. Taking money out of the public treasury for any purpose whatsoever, is just the same as taking money out of one's own pocket.

Economy in public affairs will be secured just as is economy in one's private affairs—by personal abstinence from expensive or superfluous demands upon incomes.

## THE BIG THREE

Reports from many sections of the West show there is a noticeable revival in several branches of mining, gold in particular. Reports from lumber associations show that the demand for lumber is good or better than last year. While there is no boom in the oil industry, it is operating steadily and meeting a constantly growing demand.

The foregoing might be called the "big three" in Western industries—mining, lumber and oil. These industries are the mainstay of prosperity in conjunction with agriculture in all the states west of the Rocky mountains. Conditions which discourage or cripple any one of the three immediately hurt vast areas of country and destroy the market for agricultural products.

Every Western citizen should write three words, mining, lumber and oil on his memory and come to understand that everyone has an interest in these industries, even though he has no direct connection with some mining, lumber or oil company. As we learn to protect and encourage our basic industries, we will automatically strengthen business conditions along permanent lines.

## JOKE FROM THE RECORD

There have been many newspaper thrusts at the well known and voluminous Congressional Record. We have ridiculed the wordy effusions of senators and representatives, who extend their remarks in print for the home consumption of their constituents. We often laugh at them, but less frequently laugh with them.

Occasionally, however, there appears in the Record some real wit and humor, if the reader will dig it out from the mass of uninteresting matter. An instance is noted in a recent sally by Congressman Carter of Oklahome, in a discussion of farm relief bills.

Replying to the suggestion that the farmer should "borrow money from banks to carry over his surplus," Mr. Carter said:

"I imagine that will remind already debt-ridden farmer of the young man who was seeking the hand of a girl in marriage, and when he popped the question to her, she replied: 'You must go to father.' The disconsolate young man then reeled off the following rhyme:

"She knew that I knew that her father was dead;
"She knew that I knew what a life he had led;
"She knew that I knew what she meant when she said,
"'Go to father.'"

America now produces nearly all the necessities of life, including its own naughty literature.

Quacks promise to do us good and usually they do us good and plenty.

## HORRORS OF NEXT WAR

Charged with the duty of preparing for a world conference on the limitation of armaments, a commission representing all the great powers excepting Russia is in session at Geneva. The difficulties which such a conference must face are tremendous.

Although all nations profess to be genuinely desirous of finding a way to prevent future wars, all are busy with research and experiments which are developing the most deadly engines of destruction that the world has ever seen. Electricity and chemistry are playing a large part in these developments.

Sir Frederick Soddy of England declares that "if mankind continues to pervert the inventions of science to destructive purposes, civilization in the twentieth century will commit suicide."

Radio control of ships and bomb-carrying aircraft are being rapidly perfected. New and deadlier gases are being compounded. A new discovery is said to have increased the possible effect of bonbs a hundred times. Russia is experimenting with firing disease germs from artillery and dropping them from airplanes.

In a recent report, the British Society for Chemical Research said: "What happened in the late war is mere child's play compared with what will happen between industrial and scientifically advanced powers" in the next clash of arms.

Major General Fries, head of the American chemical warfare service, declared that this form of offense "will be fifty times more deadly and effective in any future conflict than it was in the world war."

Will the world's statesmen be able to devise a plan whereby the indescribable horror and destruction of another great war may be prevented? Or, will so-called Christian nations finally destroy one another?

## SOME SOUND ADVICE

Speaking at the sesqui centennial of the Virginia colonial resolution for American freedom, President Coolidge recently gave an impressive address on the functions of the state. He urged the people to make their local government and business units so sane and strong that there could be neither need nor excuse for federal intereference. He said that no plan of centralization ever has been adopted that did not result in bureaucracy, tyranny and inflexibility.

This is not news to historians or students of human affairs. But it gains force through being the sober, official expression of a peculiarly astute American, just at a time when there are some shouters for a federal-ownership panacea.

Ole Buck broadcasts the season's worst pun: "A Nebraska City woman fed her baby daughter sausage, so she could wiener."

## WHY NOT KEEP THIS MAN?

Johannes Sielle, a young Hollander who came to America as a sailor and neglected to go back on board his ship, was rounded up by the immigration authorities and ordered deported.

While loafing around the Battery in New York awaiting the time for his departure from these shores, Tielle saw a man and woman struggling in the water some distance away. The woman had tried to commit suicide and the man was trying to rescue her, without success. Tielle promptly jumped in and saved them both.

It is said that the order of deportation may be revoked because of Tielles' heroism, if a way can be found to overcome the red tape which is entwined with such a proceeding.

It seems to us it would be pleasing to most real Americans if Tielle might be allowed to stay in this great land of the free and home of the brave. It would not be at all surprising if he should make a pretty fair sort of citizen. We had better keep him.

## THE WORLD ENLIGHTENER

Radio is bringing the nations of the world into closer contact through interantional tests and quick transmission of news items. The world's leading manufacturers of radio equipment at annual convention at Atlantic City predicted that radio would bring to listeners not only the sounds of music and spoken words, but will eventually bring vision, showing the actual performances of actors thousands of miles away.

They declared radio sets will be vastly simplified, made more compact and staple; and voiced the need of adequate radio legislation, which while encouraging the industry, would assure the public of the best possible service.

## WHY AMERICA PROSPERS

Factory workers in New York City received an average of $12.81 a week in December, 1914; in December, 1925, they received $30.73. For January, 1926, even this last rate of pay was boosted to $30.85 per worker. Wages have increased about 138 per cent, while it is claimed that living costs have increased about 70 per cent.

These figures, approximately, prevail all over the United States. It is from this surplus earning power that the country draws the pay for its autos, its radios, its new homes, its corporation stocks with 15,000,000 owners. While some industries and some sections of the country have not been uniformly prosperous, these figures show a general average. But everywher there has been a lift in conditions.

Night track meets are held out of doors in Texas. Above the bleacher section of Fair Park Stadium in Dallas a row of floodlights has been installed, and the pulling of a switch routs the shadows from every part of the field and makes the night seem like day.

It is declared that dancers make the best automobile drivers, "because of the cultivated instinct for easy and rapid changes of direction." The same accomplishment ought to help pedestrians a lot, too.

Kiplings' terse phrase, "a rag, a bone, and a hank of hair," is becoming obsolete. The hank is gone and the rag is fast disappearing.

According to a Paris authority, to dress fashionably a woman must spend $6,000 a year, but possibly this estimate includes the cost of paint.

When Maltheus gravely predicted the eventual overpopulation of the earth, he was unable to forsee the era of automobiles, gunmen and synthetic liquor.

According to a Princeton professor, one peanut contains enough energy to type 1,000 words. A handfull would probably enable a peanut politician to make a three hour speech.

Archaeologists and historians would have been greatly aided if the ancients had dated their monuments and manuscripts with the number of years B. C.

## NOTICE OF SHERIFF'S SALE

No. 125501.

In the Superior Court of the State of California, in and for the City and County of San Francisco.

Geo. A. Applegarth, Plaintiff, vs. Rose Bories, Defendant.

Under and by virtue of an execution issued out of the Superior Court of the State of California, in and for the City and County of San Francisco, on the 5th day of May, 1926, in the above entitled action, wherein Geo. A. Applegarth, the above named plaintiff, on the 15th day of August, 1925, recovered judgment against Rose Bories, the above named defendant, for the sum of Sixteen Thousand Three Hundred Thirty-two and 73-00 ($16,332.73) Dollars, lawful money of the United States of America, and One Hundred One and 20-100 ($101.20) Dollars, accruing costs.

I am commanded to sell all that certain lots, pieces or parcels of land in the Town of Daly City, County of San Mateo, State of California, and particularly described as follows, to-wit:

Lots 7, 8, 11, 12, 13, 19, 20, 27, 28, 29, 30, 31, 32, 33, 34, and 41 to 53 inclusive in Block 3 as shown and designated on that certain map entitled "Map of the Subdivision of Block No. 2, 3, 4 and 5 of the lands of the Concordia Land Company, Conty of San Mateo, Cal.," filed April 16th, 1907, in the office of the County Recorder of San Mateo County, in Volume A of Maps at page 73. Standing in the name of B. A. Banker but belonging to Rose Bories.

Lots twenty-two and twenty-six to thrity-six inclusive in Block 4 as shown and designated on that certain map entitled "Map of the Subdivision of Block No. 2, 3, 4 and 5 of the lands of the Concordia Land Company, County of San Mateo, Cal.," filed April 16th, 1907, in the office of the County Recorder of San Mateo County, in Volume A of Maps at page 73. Standing in the name of B. A. Banker but belonging to Rose Bories.

Lots 13, 19, 20, 23, 24 and 28 in Block 5, as shown and designated on that certain map entitled "Map of the Subdivisions of Block No. 2, 3, 4 and 5, of the lands of the Concordia Land Company, County of San Mateo, Cal.," filed April 16th, 1907, in the office of the County Recorder of San Mateo County, in Volume A of Maps, at page 73. Standing in the name of B. A. Banker but belonging to Rose Bories.

The property on the easterly corner of Bellevue Street and Sickles Avenue 25 feet frontage by 100 feet depth, irregular with L in rear of 20 feet by 50 feet irregular. Standing in the name of B. A. Banker but belonging to Rose Bories.

Lot on north side of Hanover Street 267 feet westerly from the westerly line of Whittier Street with a frontage of 26 feet and a depth of 209 feet. Standing in the name of Minnie Epstyn but belonging to Rose Bories.

Public notice is hereby given that on Tuesday, the 22nd day of June, A. D. 1926, at the hour of Ten o'clock A. M. of that day, in front of the County Court House, in the Town of Redwood City, County of San Mateo, State of California, I will sell all the right, title and interest of the said Rose Bories in the above described property at public auction for cash in lawful money of the United States of America, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Redwood City, California, on the 25th day of May, 1926.

T. C. McGOVERN,
Sheriff of San Mateo County.

*Liberty*

"PROCLAIM *liberty throughout all the land, unto all the inhabitants thereof*—this was the legend inscribed on what was later to be known as the Liberty Bell, when it was recast in Philadelphia in 1753.

Twenty-three years later this prophetic admonition was carried out when the now historic bell heralded the adoption of the Declaration of Independence.

A century after this assertion of American liberty, Alexander Graham Bell gave to America and to the world, in the telephone, an instrumentality of a new form of freedom. Limitations which had confined the scope of the spoken word were swept away. Doors of isolation were thrown open. In his contacts with his fellows, man had achieved a new independence.

For fifty years this emancipation of speech has undergone an unceasing evolution into a larger and ever larger liberty. Year by year man's voice has reached out over greater and greater distances until today it speeds from coast to coast, borne on the wires of a nation-wide telephone system.

# Colma News Notes

By SYLVIA HAUBRICH FISCHER

Carl Jones, of San Francisco, was in town last Tuesday, visiting relatives.

The Colma Vegetable Growers' picnic will be held at Niles canyon on June 12.

Mr. and Mrs. Earle Jones, of First avenue, spent the holidays at Winters and Sacramento.

Miss Thelma Selmi visited Miss Iva Garcia, of San Francisco, on Tuesday evening of this week.

Mr. and Mrs. Jean Grey have left on an extensive motor trip and plan to spend some time in Montana.

Mr. and Mrs. Cornelio Bernal, of San Francisco, visited Mrs. B. W. Haubrich last Tuesday afternoon.

Mrs. Annie B. Baur and Miss Rosa Bauer, of Price street, spent last Sunday at Half Moon Bay at the Charmarita.

Mr. and Mrs. E. Maffei, of Lomita Park, visited Mrs. B. W. Haubrich, of Mission street, last Wednesday evening.

Misses Grace Johnston and Tessie O'Connor have returned home from Yosemite, where they spent a most enjoyable week.

On Friday evening the members of La Fiesta Social Club will be entertained at the home of Mrs. Christine Michelson Hume by Mrs. Hume and Miss Thelma Selmi.

Local friends of Miss Dorothy Baines, of El Verano, formerly of Colma, have recevied the announcement of her graduation from Sonoma Valley Union high school.

A whist party and dance was sponsored by El Carmelo Parlor No. 181, Native Daughters of the Golden West, in Masonic Hall, Daly City, last Wednesday evening. An excellent four-piece orchestra provided music for dancing until a late hour. Sylvia Fischer was in charge of the affair.

Miss Florence McKendrick motored to Napa last Sunday with a party of friends.

Many local people attended the St. Maximus whist party and dance last Tuesday night.

Mrs. Robert Silva and Miss Roberta Silva, of Palo Alto, visited Mrs. B. W. Haubrich last Wednesday.

The Silicani home has been remodeled and is now being painted and redecorated by Carl Schwarz.

Master Paul Silva, of Palo Alto, spent the past week with his cousin, Bennie Haubrich, of Mission street.

Mr. and Mrs. E. Maffei, of Lomita Park, purchased a Dodge Sport roadster from David Arata, local Dodge dealer.

The annual banquet of the Colma Volunteer Fire Department will be held in the Belli banquet hall in the near future.

The Senior ball which was held at Jefferson Union high school auditorium last Saturday evening was a most successful affair.

Miss Louise Merlo will be married to Mr. Alfred Zanetti at Holy Angels church, on San Pedro avenue, on Saturday evening, June 5, at 7:30 o'clock.

The Colma Community Center will sponsor a social whist party and dance on Saturday evening, June 5. Louis Scragmalia and son will furnish the music for dancing. You are assured an enjoyable evening.

On Wednesday afternoon, June 9, a whist party will be held in St. Maximus social hall, Daly City, at 2 p. m. Mrs. Charles Vernengo, chairlady, and her committee are working very hard for the success of this affair.

The members of the drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, presented a drill at the San Francisco gymnasium, on Divisadero street, San Francisco, on Thursday evening as a feature of a dance and entertainment. The girls did excellent work and received much applause.

David Arata has opened a new Dodge Brothers' authorized service station on Mission street. Here you may get expert repairs, genuine Dodge Brothers parts and tires and supplies. Mr. Arata is prepared to care for all your wants, and you will receive the kind of treatment which will please you.

The California History Club of El Carmelo Parlor No. 181, Native Daughters of the Golden West, met at the home of Mrs. Josephine Johnson in the Crocker Tract on Monday evening of last week. An excellent history report was had and the members enjoyed the KTAB radio program presented on that evening by the Native Sons and Daughters.

Mrs. Stephen Fischer tendered Miss Louise Merlo, of Vale street, a miscellaneous shower at her home on Castle street last Tuesday evening. A radio program was enjoyed by the guests until a late hour, when a midnight supper was enjoyed by the following: Miss Rosa Bauer, Miss Libera Botto, Miss Yolanda Lagomarsino, Miss Annie Boetto, Miss Louise Merlo, Mrs. Louis Merlo, Mrs. B. W. Haubrich, Mrs. John Merlo, Mrs. Joseph Merlo, and Mrs. Fischer. Miss Merlo was the recipient of many lovely gifts.

Miss Iva Garcia, bookkeeper in the office of the Pioneer Tire and Truck Company, will be married to Mr. Ewald Solbach in St. James church, San Francisco, at 9 a. m., with nuptial mass. Miss Thelma Selmi will be the bridesmaid.

The friends of Miss Rosa Bauer are proud of her well delivered address at the graduation exercises of Jefferson Union high school last Friday evening. Miss Bauer and Miss Anita Varni graduated on that evening.

Joseph Lavagnino has recently been admitted to membership in the Colma Volunteer Fire Department, and the application of Oscar Woolsey will be acted on at the next meeting. There are many more applications which will be considered at first vacancy.

St. Maximus church, on Wellington avenue, Daly City, was the scene of a pretty wedding last Saturday evening when Miss Olga Selmi, daughter of Mr. and Mrs. A. Selmi, of Daly City, became the bride of Mr. Edwin Cuneo. The bride was beautifully gowned in white satin with a tulle veil and carried gardenias and lillies of the valley. Miss Doris Cuneo, the maid of honor, wore Nile green georgette, and the bridesmaids, Miss Thelma Selmi and Miss Vera Monetti, were gowned in georgette, Miss Selmi in yellow and Miss Monetti in orange. All the attendants carried bouquets of roses and wore silver bands on their hair. The little flower girls, Muriel Salveroso and Gloria Giannini, wore pink and carried baskets of roses. Tony Cancilla was the best man, and the ushers were Louis Cresta and Duke Canepa. Mrs. Beatrice Batz sang "Oh, Promise Me," and "Because," being accompanied on the organ by Miss Clara Poket. The young couple received many gifts and have the best wishes of their friends for a happy future. Following the honeymoon, which is being spent on a motor trip in California, the young couple will reside with Mr. Cuneo's parents in San Francisco.

## POWER OF 170 MILLION

Before the advent of steam and electricity, when all manufacturing was done by hand, the production of a community or a nation was necessarily limited by the number of its population. One man merely meant one man's power and one man's production.

How this situation has been changed by the introduction of power-driven machinery is forcibly stated in a recent address by J. E. Davidson, president of the National Electric Light Association, in which he declared that electric motors in the United States are doing as much work every day as could be accomplished by 170,000,000 men.

When it is considered that there are only 45,000,000 men and women engaged in gainful occupations in this country, the significance of Mr. Davidson's statement may be better understood. It means that every worker in the United States has on an average four times the power he would possess without the aid of electricity.

Yet, he added, the electrical industry is still young, and we can again double our production. We can lift much more of the load from human backs. Regarding the further possibilities of electricity, he said:

"More than ten million homes are not yet wired for electric service; a large part of American industry remains to be electrified; only 10 per cent of the farms of the country have electric service, and less than 2 per cent of the railroad mileage is electrified."

Who can predict the changes which the future development of electrical power shall bring forth?

## WHERE DOES CALIFORNIA GET ITS VACATIONISTS

Thousands of people spend each winter in California. Whence do they come from?

If a record of long distance telephone calls is any criterion, more residents of Chicago make California their winter home than from any other point. New York comes second. These facts were arrived at through a study of the calls made over the direct wires which connect Los Angeles and its neighboring communities with the east. The test was made during the last Christmas season, when people away from home are especially desirous of talking to the home folks and giving them a Christmas greeting.

Of course, not all such calls were to the large cities, but there were more for Chicago than any other point. Next came New York. Following New York came Philadelphia, Boston, Kansas City, Detroit, Dallas, Minneapolis and Pittsburg.

These calls traveled east from Los Angeles to Yuma, Maricopa and Tucson, then on to El Paso and up to Denver and thence to Chicago and other points.

Those who would sell antiques to Henry Ford must be encouraged by the fact that he recently paid $5 for the cornerstone of the school house where "Mary's Little Lamb" is said to have "made the children laugh and play."

Commander Matsunaga of the Japanese Navy has invented an airplane with helicopter attachment, which is said to make flying safe under practically all conditions.

## A REAL ACHIEVEMENT

What promises to be a notable contribution to the fruit industry of the nation has just been made by the Pacific Gas and Electric Company, in San Francisco. Likewise it is of value to everyone who uses gas.

Gas-making has required a coal or oil free from sulphur, or else an expensive, cumbersome purifying process to remove the excess sulphur. The Pacific Company experiemented for years to find a sulphur eliminator that would enable it to use the cheaper fuels. At last it has devised such a process, by which it can use even the most highly sulphereted coal with success.

That much is of benefit only to the gas user. The other side is the saving of the sulphur, in a microscopic powder, almost a true collodial form. The company will make 600 tons of this sulphur a year, which is admirably adapted to fruit spray uses, because of its finenes and spreading and clinging qualities. It can be used for other commercial purposes, but it is especially good as an insecticide.

The Pacific Gas and Electric Company has done many notable things, among them the building up of a property worth $274,000,000, service to 813,698 customers in 291 cities and towns in thirty-eight California counties, payment last year of $3,344,022 in taxes, development of 725,167 horsepower, wages paid to 10,800 employes, of whom 3,200 are stockholders with more than $1,000 stock each, and distribution of the stock to 34,863 stockholders.

But its laboratory pioneering in gas for cheaper fuel, and in a more adequate fruit protection through this new sulphur product, is also a real achievement.

## CERTIFICATE OF CO-PARTNERSHIP

State of California, County of San Mateo.

We, the undersigned, do hereby certify that we are partners transacting business in this State, in the County of San Mateo, under the firm name and style of Pantaleoni Bros. That the names in full of all the members of such partnership are Vincenzo Pantaleoni, Joseph Pantaleoni, Vittorio Pantaleoni and Armando Pantaleoni; and that the places of our respective residences are set opposite our respective names hereto subscribed.

In witness whereof we have hereunto set our hands this 28th day of April, 1926.

Vincenzo Pantaleoni, residing at Colma, San Mateo County, California.
Vittorio Pantaleoni, residing at Colma, San Mateo County, California.
Joseph Pantaleoni, residing at Colma, San Mateo County, California.
Armando Pantaleoni, residing at Colma, San Mateo County, California.

State of California, County of San Mateo.

On this 28th day of April, one thousand nine hundred and twenty-six, before me, Angelo J. Scampini, a Notary Public, in and for the County of San Mateo, residing therein, duly commissioned and sworn, personally appeared Vincenzo Pantaleoni, Vittorio Pantaleoni, Joseph Pantaleoni and Armando Pantaleoni, known to me to be the same persons described in, whose names are subscribed to and who executed the within instrument, and they duly acknowledged to me that they executed the same.

In witness whereof, I have hereunto set my hand and affixed my official seal, at my office, in the County of San Mateo, the day and year in this certificate first above written.

(SEAL.) ANGELO J. SCAMPINI,
Notary Public in and for the County of San Mateo, State of California.

My commission expires April 27, 1927.
Pardini & Scampini, Attorneys at Law.

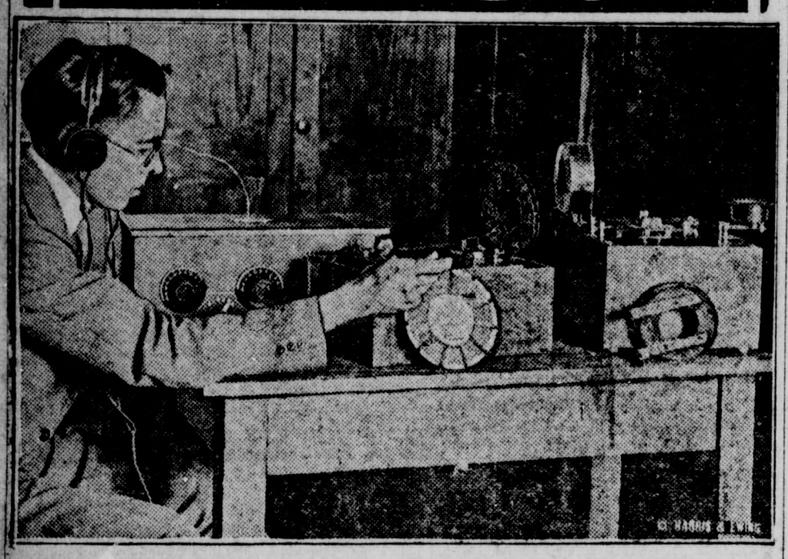
# RADIO



Morris S. Strock of the Government Radio Laboratory Has Designed and Built an Apparatus to Measure Frequencies of Stations.

With short wave radio transmission now emanating from practically every corner of the earth, a tremendous interest in this form of communication is being predicted for this summer.

According to the most recent list of the world's short-wave stations there are approximately 130 transmitters operating on regular schedules on wave lengths between 13 and 115 meters. The total is expected to be almost doubled by the end of the year.

**United States Leads.**

The United States maintains the lead in the short-wave stations, principally through its naval transmitters and the experimental stations of the low-wave pioneers among the radio manufacturers. General Electric company, A. H. Grebe & Co., the Westinghouse Electric and Manufacturing company, the Radio Corporation of America together operate practically one-fourth of the high-frequency plants.

Included in the list of stations on low waves are transmitters located in Germany, England, Java, Sweden, Holland, Russia, France, Hawaii, Samoa, Canal Zone, the Philippines, Japan and aboard the ships of the United States fleet scattered throughout the world.

In addition there are many others operated by amateurs who have received experimental licenses to broadcast within the low-wave bands assigned for that type of work. Through co-operation of the International Radio Amateur union, which was created last year, the low-wave communications, both in code and voice, are being relayed extensively throughout the world.

**"Radio Boat" Experiment.**

Among the interesting experiments to be undertaken soon in short-wave transmission is the "radio boat" to be launched by the Grebe company, and which is expected to cover the Bermuda races, not only for short-wave receivers but for broadcasting by the higher wave stations.

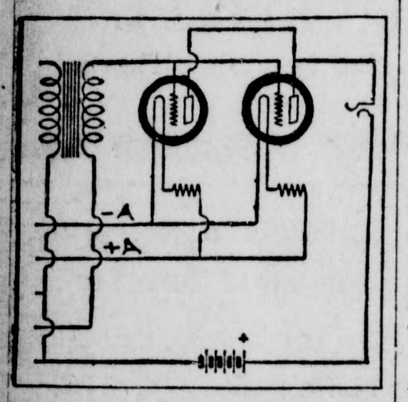
The extent to which the short wave is being used for re-broadcasting in other parts of the world was shown recently in the announcement by the General Electric company that a scheduled relay of a program for the annual agricultural show of the South African Union was received clearly and re-transmitted. Included in the two-hour program was an address by Secretary of Agriculture Jardine and a concert from Schenectady.

## Parallel Tubes Reduce Impedance; Aid Output

In various set building experiments going on there appears to be an inclination toward the use of parallel tubes, that is, two tubes with their grids connected together to the input and their plates connected together to the output circuit.

In studying this type of tube connection it must be borne in mind that the push-pull combination is not a parallel tube arrangement. It is more of a relay system. One tube takes up the signal when the other lets go.

In connecting two grids together both grids are at the same voltage at



System That Reduces Impedance and Improves the Output.

the same time. Both plates, being connected together, are at the same voltage at the same instant. But an essential in smooth action is that both tubes must be alike, which seldom happens. It is the same situation with a team of horses. Unless they are matched there will be a difference in the work they do.

Aside from these considerations, putting the input circuits in parallel cuts the input impedance to one-half of its value. Likewise, plate circuits in parallel cuts the output impedance to half value. In the output circuit, therefore, to match the tube impedance, the transformer or choke or resistance would naturally have one-half the impedance it had when matching a single tube. In other words, smaller chokes and smaller primary inductances will give better results than the high values, assuming the latter to be correct for a single tube. But another way, the cheaper types which do not give such desirable effects on a single tube should be better on the parallel tube.

## Tube Insurance That Is Worth Remembering

Probably many tubes are burned out every year by accidentally connecting a high-voltage "B" battery across their filament terminals. There are many ways to prevent such an accident from happening, and one of the easiest is to connect a high resistance in the negative lead to the "B" battery. An ordinary 10-watt electric-light bulb is one high resistance which may be used for this purpose. If the use of the lamp causes a howling noise to be heard, shunt it with a 1-mfd. condenser.

## ETHER WAVES

Never touch the inside of a set when it is in operation.

The most common source of trouble within a radio set is in the tubes or in the sockets.

The direction in which the antenna points affects the loudness of the signals received.

An aerial is not essential with a sensitive set employing two stages of radio frequency amplification.

When using the variocoupler as a single circuit set reverse the tickler connections if it will not oscillate.

Coils for high frequency currents should always be wound with nonmagnetic material, preferably copper.

The ground is one of the most important portions of the radio circuit.

Crystal detectors operate as long as the detector is in good condition.

Excessive resin from solder can be removed with alcohol and a soft cloth.

If a listener is bothered by having the station programs fade the cause may be with the aerial of the receiving set. If the antenna becomes loose and swings in the wind it will often cause weak signals.

## America's Importance in Great Radio Field

Until radio became a part of American communication service, this country was, in effect, reliant upon foreign countries, especially in time of war. Since radio has been developed, however, the United States has taken its place in the sun, so to speak, and within the last six years has, through its private and public enterprise and initiative, given America direct communication with Great Britain, France, Italy, Germany, Holland, Poland, Sweden, Norway, the Argentine, Japan, Java, Hawaii, Brazil, Chile, the Philippines, China, French Indo-China and Australasia. The American radio "network" is comparable only to the cable network of Great Britain.

## Radiation Different From Regeneration

Many people have the mistaken idea that regeneration means radiation, or vice versa. This is not true. Regeneration and radiation are not synonymous, and should not be confused.

A radio set may contain regeneration in its circuit without offending by radiating. On the other hand, a so-called nonregenerating receiver may be, and frequently is, a most violent offender from radiation. A radio set radiates—sometimes improperly called "reradiates"—when the tube directly or magnetically connected to the antenna, oscillates and causes the antenna likewise to oscillate and give off energy.

## Radio Transformers

If distortionless amplification is desired the transformer in the first stage of audio amplification should not have a ratio greater than 5:1. The second stage transformer should have a 3:1 ratio.

## Buried With Honors of War

THE career of Capt. John Halsey is unique in that he not only died in bed—not "with his boots on," as so many pirates did, but that he was given honors of war when buried.

Halsey began as a privateer off the Newfoundland banks under a commission from the governor of Massachusetts, but no sooner was he out of sight of land than he turned pirate. After capturing a few fishing vessels he sailed for the Canary islands, where pirating promised to be more lucrative. After capturing a Spanish vessel near the Canaries he sailed around the Cape of Good Hope for a visit with the pirates in Madagascar.

In the Red Sea he overhauled a fine Dutch ship armed with 60 guns, then by some strange quirk of conscience decided that thereafter he would leave the shipping of Christian nations alone and prey upon Moorish shipping only. His crew became angry at his announcement to this effect, mutinied, and threw him into irons. Then they attacked the Hollander, but were being roundly thrashed when they released Halsey, who got the ship away safely.

For several weeks thereafter Halsey scoured the seas in search of Moslem vessels, but luck was against him. So he gave up his resolve and attacked the British ships, the Essex and the Rising Eagle. From the Essex the pirates took more than 50,000 pounds in English gold, and from the other, more than 10,000. Upon discovering that the captain of the Essex was an old friend of his quartermaster, Halsey returned all of the captain's personal belongings, but kept the 50,000 pounds!

Halsey was something of a business man as well as a pirate. After the capture of these two vessels he made out invoices and sold the two ships back to their owners for cash! Then he returned to Madagascar where he was visited by the captain of the Scotch ship, Neptune, which had come to trade in rum with the pirates. This visit was providential for the pirate leader. A hurricane destroyed his ships, and he immediately seized the Scotch vessel. Then he attacked and seized another ship filled with merchandise which the pirates had just sold to its captain and for which they had received their pay.

Captain Halsey died of a tropical fever in 1716. From a contemporary the following account of his funeral is taken: "With great solemnity, the prayers of the Church of England being read over him, and his sword and pistols laid on his coffin, which was covered with a ship's Jack. As many minute guns were fired as he was old, viz: 46, and three English volleys and one French volley of small arms. His grave was made in a garden of watermelons and fenced in to prevent his being rooted up by wild pigs." Great honor, indeed, for a ruthless sea rover! And what a touching thought that last sentence!

## "Piracy Without Tears"

IN ALL history of piracy there is no more amazing figure than that of Captain Misson, the founder of "piracy without tears." Instead of a black flag, he sailed under a white flag; he pillaged with an apology; he founded a piratical Utopia which failed through no fault of his and finally he died as had many an honest sailorman, lost at sea in a storm.

Misson came of an ancient French family in Provence and was well educated. Reading books of travel gave him a desire to see the far corners of the earth and during a visit in Rome he made an acquaintance which changed his whole career. This was Signor Caraccioli, a Dominican, who had given up the priesthood for a gospel of atheism and communism. Misson became a convert to Caraccioli's views and they became comrades on a French privateer. When the captain of this vessel was killed in a battle with an English ship, the Italian, who was something of a soap box orator, stepped forward with an eloquent address and a proposal that Misson should become captain. Misson replied with a speech that was even more florid and under this flood of oratory, the volatile French sailors broke forth into cries of "Vive le Capitaine Misson et son Lieutenant le Scavant Caraccioli!" and endorsed the election.

The first question that the new officers were called upon to decide was a choice of the flag under which they were to sail. One sailor was so foolish as to propose the dread emblem of piracy, the black flag. This brought forth another flood of oratory from the new lieutenant, filled with references to "Peoples' Rights and Liberties," the "Yoke of Tyranny" and "Oppression and Poverty." Their lives, he declared, unlike the life of a pirate were to be brave and just and innocent and their cause of the Liberty. He suggested a white ensign with the motto "For God and Liberty" on it.

Again the sailors were swept away by the eloquence and with cries of "Liberty! Liberty! We are free men!" and a plentiful supply of "vives" for both men, they ratified the decision. In fact speechmaking and "viveing" seem to have been the principal occupation on this strange pirate craft at first and they kept it up as they set out to spread their gospel of sweetness and light and extend their doctrines of freedom to making free with other

## OWL AND SONG SPARROWS

A little family of song sparrows had come to join the barnyard people.

What Is the Trouble?

They had not been invited to come, nor had the farmer brought them in his big wagon, but they had arrived.

They always disappeared when it came time to go to sleep and none of the animals had been able to see where they slept.

They were all so anxious to see them put their heads under their wings, which they had heard was the way birds slept.

No, these song sparrows came just at meal time and ate bread crumbs, grain, seeds, worms and fresh water.

After they had finished a meal they always sang a little song, which was probably their manner of showing how much they appreciated the hospitality and kindness of the barnyard animals.

One evening the song sparrows had had their supper and had not yet flown away.

Sir William Goat—sometimes called Billy, which was a more chummy but less "grand" name—had tried to get them to talk.

They had chirped and twittered, but Sir William had not been able to understand a word of what they had said.

Mrs. Gray Dove had gone off for a visit and there seemed to be no one who understood what the song sparrows were trying to tell them.

They were really trying to say how worried they were, for they had found their nest was very near that of Mr. Owl—and they did not know where they could go for safety.

Off they flew and their wings fluttered nervously.

The animals had all gone to bed when they heard frightened little voices and some cries.

They opened their eyes—and there, flying toward them, was the whole family of song sparrows.

"What is the trouble?" asked Mrs. Gray Dove, who had arrived home just before bedtime, "I think I can understand the way you talk."

"Oh, Mr. Owl was going to pay a visit to our nest tonight and kill us and eat our eggs.

"Oh! Oh! T-r-r-r!

"We woke up just in time to see him coming, and we flew here, for he won't come near the barnyard on account of the farmer's gun, we've heard."

"There, there," said Mrs. Gray Dove softly. "You can make your home in the orchard near by."

The song sparrows brightened up. But in the woods old Mr. Owl was scolding as hard as he could.

He was scolding himself!

"If I'm not sharper," he was saying, "and quicker, too, I'll lose my reputation of being the wisest bird—yes, wise and cruel," and he blinked his eyes with rage!

In the meantime Mr. Blue Jay and Sharpy, the Squirrel, who had not been through such danger, were quarreling with each other.

Their voices were so loud that all the creatures far and near stopped whatever they were doing and listened.

"You stole my berries!" said Sharpy.

"I never did such a thing," said Mr. Blue Jay.

"Didn't he?" asked Sharpy of Mrs. Sharpy.

"Of course he did," scolded Mrs. Sharpy.

"And we want them to eat," said the little squirrels, who were sitting on a fence near by listening to the quarrel.

He Was Scolding Himself.

They loved to hear a good quarrel and their daddy and Mr. Blue Jay were having splendid ones.

"You know, Sharpy," the Blue Jay was saying in a loud and angry voice, "that I never steal!"

"What's that you say?" asked Sharpy in surprise.

And so they quarreled while the little squirrels listened delightedly. But the Song Sparrows were peaceful and happy and their worries were over.

### *Not a Centipede*

Hardware Merchant (to new boy helper)—When you see a customer come into the store, smile politely and advance about three feet.

Boy—Three feet? Why, I only have two.—Good Hardware.

### *His Opinion*

"Well, Willie, what is the baby worth?"

"Daddy said $82, but I think the doctor soaked us."

## Iris, as "Miss Flamingo"

By CLARISSA MACKIE

(Copyright.)

JOHN LAWRENCE stole a glance at the discontented face of his elderly client. Marcus Marshfield had half a dozen homes scattered through the country. Without any near relatives, Marshfield had contented himself with many friends, but he had reached the three-score mark and was rheumatic.

"I hope you can remain a couple of weeks with me, John," he told the young lawyer. "I miss your father since he passed on."

"We all miss him, sir," said John, who had inherited the Marshfield interests along with other clients when his father died. "I'll stay on a few days, but I never have played around in winter—ours is a busy office."

In the distance appeared a rosy cloud that was moving rapidly toward them—it thinned out as it neared, appearing long and straggling.

"It is beautiful," commented John. "What is it—birds?"

"Flamingoes."

They reached for field glasses but the flock had veered to the south and was settling down, a compact pink mass, behind the tall trees.

Marshfield shivered and sent a black servant for a rug. He stared down the length of the tropical garden, where an old rail fence snaked its way, shutting out the encroaching woods.

"What is that?" he asked sharply "—a—flamingo? The thing is trying to get through the fence—ah, it's fallen. I'm going down to have a look at it, sir. Can I lend you an arm?"

"I have my crutch," snapped Marshfield, and John slowed his own pace to that of the lame man. "What in thunder are you doing here?" he snapped out at the flamingo, which was revealed to be a young girl wearing a tattered frock of rosy cotton.

The girl sat down on the grass and lifted smouldering black eyes in a steady glance. "You know why I am here, Grampus," she said.

"'Grampus' indeed!" snorted Marshfield angrily. "I have forbidden you to come here at all, Iris!"

"I hate to come—it makes me ill to trespass on property that should have been my father's inheritance, when he is dying—"

"Dying?" whispered Marshfield fearfully, "Henry dying."

John Lawrence saw the tragedy in the young eyes, as she turned slowly and crept back through the fence. Then she turned, her lovely face scornful. "What a poor, meager-souled old man you are, Grampus! Not even a blessing for your dying son!" she fled through the wooded path, a brilliant rosy thing, with a breaking heart, and after her sped young John Lawrence, fleet of foot, a famous runner. He caught up with her in the deepest wood where she had sunk down on the doorstep of a small tumble-down cottage.

"Miss — er — Flamingo!" gasped John, "what can I do for your father —quick, tell me!"

"Doctor—medicine—food," she murmured, and looked after him as he followed her directions toward a flat-bottomed boat on the small stream. "He was with Grampus—I must go in and tell daddy that Grampus is too ill to come—" Thoughtfully, almost fearfully, she went into the back room where a man's thin form stirred on a narrow camp bed.

"Grandfather could not come, daddy darling, but he has sent a young man to do the errands—the doctor will be here almost at once—you are better?"

He smiled wanly. His voice was weak. "Fever's gone," he gasped. "Was father kind to you, love?"

"He was, darling," she lied. "I don't think he likes my calling him Grampus, though."

"You mustn't—it is disrespectful. He is a good man, but disappointed because I married your mother. If she had lived—" He closed his eyes.

Presently, John Lawrence came, with doctor, medicines and a load of provisions.

There was a sound of rustling leaves outside, and the clump-clump of crutches on the veranda. "Grampus!" cried Iris, and ran to bring him inside.

John Lawrence went back through the wooded path. Now that Marcus Marshfield had become reconciled with his son and lovely granddaughter, they would bring young Henry home to the handsome home. He was glad of all that—Marshfield should have an heir, and Henry, though temporarily out of luck, would succeed. He wondered if he would ever see Iris again before she became wonderfully molded into the state in society to which she naturally belonged. At the snake fence, he paused and dreamed of her soft loveliness. A sudden rush of air and she blew past, and perched on the top rail of the fence.

"Please let me thank you!" she said.

"Never! You will be coming to New York soon?"

"In a few weeks—I will find you—somehow," she said, and fled into the thicket.

It was February when the office boy brought in a white card on which was scribbled "Miss Flamingo," but John did not get his reward until two years later when they were married in St. Thomas' with much fuss and feathers.

"Why not?" laughed Iris. "Am I not a flamingo?"

The average factory wage for New York state in 1914 was $597 a year.

# HIGHER THAN WOOLWORTH BUILDING

**The Yearly Sales of Lydia E. Pinkham's Vegetable Compound**

The Woolworth Building in New York City, which towers 792 feet above the street, is our highest building.

If all the bottles of Lydia E. Pinkham's Vegetable Compound sold in one year could be placed end to end, they would make a column as high as the Woolworth Building. And there would be enough left over to extend from Lynn, Massachusetts to Cleveland, Ohio.

"I have lots of work to do and I am not very strong, but I was getting worse all the time until I began taking Lydia E. Pinkham's Vegetable Compound. I used to lose my appetite completely at certain times, but I feel very well since I began taking this medicine. I think so much of it that I would go before a notary and swear to its merits. You could step into my home any time and you will find a bottle of Lydia E. Pinkham's Vegetable Compound."—Mrs. Frank M. Casey, 220 South 11th Ave., Mount Vernon, N. Y.

DR. C. H. BERRY CO.
2973 Michigan Ave. - Chicago, Ill.

### *Imaginary Feast*

The expression "Barmecide's Feast," meaning an imaginary banquet, originates from a story in the "Arabian Nights" entertainment of a rich Barmecide, to whom a poor man, Shacabac, applied for charity, saying he was starving. The Barmecide invited the poor man to dinner and, calling for rich foods and rare wines, although none was actually provided, described each in detail as he urged his guest to fall to and enjoy himself. Shacabac entered into the spirit of make-believe and expressed his enjoyment of the imaginary feast. By so doing he won the favor of the rich man, who thereupon provided him with real food and later gave him a responsible post in his household.

### *Numbers World's Jews*

How many Jews are there in the world? According to the expert, Doctor Lestchinsky, there were in the world only a few more than 14,000,000 in 1925, and the rate of increase is not great. Of the total, the vast majority, namely 9,232,276, live in Europe. America has only 3,844,089, and Asia, Africa and Australia insignificant numbers. In 1897, Europe contained nearly 84 per cent of all the world's Jews; today it has only 63 per cent. The Jewish movement toward the new world is distinctly visible. Now the Jews in America are 2.1 per cent of the total population.

On their own merits modest men are dumb.—Coleman.

# Help That Achy Back!

Are you dragging around, day after day, with a dull, unceasing backache? Are you lame in the morning, bothered with headaches, dizziness and urinary disorders? Feel tired, irritable and discouraged? Then there's surely something wrong, and likely it's kidney weakness. Don't neglect it! Get back your health while you can. Use *Doan's Pills*, a stimulant diuretic to the kidneys. *Doan's* have helped thousands, and should help you. *Ask your neighbor!*

**A California Case**

J. B. Smith, retired blacksmith, 99 W. Villa St., Pasadena, Calif., says: "The kidney secretions contained sediment and burned in passage. There was a lameness through my back and when I stooped, sharp pains took me and dug in deeper when I straightened. Doan's Pills regulated my kidneys and drove the pains from me."

# LINGERIE FOR SUMMER WEAR; OUTFITS FOR THE VACATION

GONE are the good old days when one type of undergarment suited everyone and all women owned "under-muslins." In the class of materials used now, muslin is away down toward the foot, while silk crepe stands at the head, with many more or less filmy rivals, between them—as ninon, voile, georgette, wash satin, rayon, silk-and-cotton crepe and pongee. Styles are almost as varied as materials and style is an important factor in the success of any sort of undergarment. The most practical minded of women demand daintiness and favor prettiness in their underthings.

Just now allegiance is divided between the straight line and the waistline silhouette, in combinations, and between the straight and bloused line in gowns. There is a flair for flares, in the filmier combinations and one may choose between tailored, semi-tailored and lacy types. Waistlines and flares are considered youthful and fine plaits are featured, just now, as an important adornment for nearly all kinds of lingerie. Alencon lace has taken on new importance as a trimming feature and white and flesh color are winning more attention in the best grades of silk underwear, than they have had for sometime. A pretty combination (shown in the picture) is made of flesh-colored crepe de chine and includes plaits, alencon lace and a waistline in its styling.

The newest arrivals in materials are rayon and cotton mixtures, and silk and cotton mixtures. The rayon mixtures are popular for slips and pajamas and, for the latter, are often patterned in stripes or plaids of vivid colors. The silk-and-cotton mixtures are printed in dainty floral patterns and are used with lace or net for combinations or gowns. Flowered voile, with net frills, is liked for gowns and dotted nets are used with all the sheer materials in yokes or banding, decorated with applique motifs, cut from silk, and machine embroidered.

With the rank and file of sensible women outfitting oneself for summer means outfitting onself for outdooring—for outings, vacations, motoring, journeys and sports. Real sports clothes and clothes of the sports type have proved themselves the most satisfactory—come what may on the summer day. But it is not this dependability that has made them so popular—it is their becomingness and their casual and smart style. The sportish types in coats, skirts, blouses and hats are cheerful and allow the use of light or vivid colors, and one is well enough and not too much dressed in them for all usual occasions.

For coats and suits, tweeds, homespun, kasha, jersey, serge and flannel provide a choice of materials, and any of them may be used in the chic, separate skirts, to be worn with sweaters, jumpers or blouses, that prove themselves so useful. Crepe de chine is used for lightweight, plaited skirts and for shirts, along with other washable silks and cottons, that complete some of the coat suits. Printed silk blouses and scarfs in gay colors seem to add color to white costumes, when jumper, sweater or jacket is not fulfilling this mission.

Very large block plaids in serge make effective skirts and dresses with coats of plain colors to match the dominating color in the plaid. Large checks in white and a color make effective short coats, worn with plain skirts in a contrasting or in self color. Flared skirts and jumper blouses of kasha, in light or high colors, are among the most attractive models. Tweed coats, in fancy weaves, worn with skirts to match and contrasting blouses are not outrivaled in any particular for sports wear—these coats do double duty, being correct for general wear. A coat of cross-bar tweed, is shown in the picture, worn with a flared flannel skirt, a blouse of figured silk and a soft felt hat. All the colors of the rainbow are represented in the displays of sports and semi-sports clothes.

Latest Style in Lingerie.

Equipped for the Vacation.

If our hearts go out in love to all with whom we come in contact we inspire love and the same ennobling and warming influences of love always return to us from those in whom we inspire them.—Trine.

### SALADS, OTHER DISHES

A few peas left from the dinner of the previous day may be added to a salad of chopped dill pickles, peanuts and a bit of grated onion. Serve with a highly seasoned salad dressing on lettuce.

**Cheese and Banana Salad.**—Remove the skin from two bananas, scrape them and cut into halves lengthwise. Mix one neufchatel cheese with two tablespoonfuls of chopped mint leaves; add salt and French dressing to moisten. Spread one-half the mixture on the slices of banana, cover with the other slices and press firmly. Cut into slices and arrange on lettuce; serve with French dressing. Chopped nuts or olives may be used for variety in place of mint leaves.

**Tomato Jelly Salad.**—Take two cupfuls of tomato juice—either fresh or canned; to it add one-fourth cupful of mild vinegar, two tablespoonfuls of gelatin, a tablespoonful of sugar, one-fourth of a bay leaf, two stalks of celery, two slices of onion and one and one-half tablespoonfuls of lemon juice. Stir and cook over the heat until the gelatin is dissolved, set in a dish of crushed ice and when the jelly begins to thicken add the tender leaves of young dandelion cut into bits. Mold the jelly; turn out and garnish with scallions cut into strips and fringed at the ends. Let them stand in water until curled.

**Stuffed Tomatoes.** — Take small even-sized tomatoes of a good ripe color, scoop out the centers and fill with finely cubed cucumbers and onion well seasoned with a good salad dressing. Serve well chilled on a heart leaf of lettuce.

**Mutton Broth**—Cut one pound of the neck of mutton into small pieces. Cover with cold water and simmer gently for several hours. Season and strain through a cheese cloth. Add a tablespoonful of cooked rice or barley; this adds to the nourishment. Chill and remove all fat, reheat and serve.

**Popovers.**—Take one cupful of flour, one-fourth teaspoonful of salt, add seven-eighths of a cupful of milk, and beat well, add two well-beaten eggs an one-half teaspoonful of melted butter; beat, using a Dover egg beater. Bake in deep popover cups about thirty-five minutes in a hot oven.

### Bread and Cake.

The breads and fancy cakes which we buy from bakeries and food markets are good and attractive, but may be made at home, better and much cheaper.

**Whole Wheat Nut Bread.**—Soften one quarter of a cake of yeast in two tablespoonfuls of water; add one cupful of scalded and cooled milk, one-fourth of a cupful of dark molasses, one teaspoonful of salt, two and one-half cupfuls of entire wheat flour and one cupful of nutmeats. Mix and knead until smooth. Let rise until double its bulk, adding the chopped nuts to the last kneading. Shape into two loaves, let rise again and bake.

**Luncheon Rolls.**—Add two tablespoonfuls of sugar, one-fourth teaspoonful of salt to two cupfuls of scalding hot water; when cool add one-half of a yeast cake dissolved in two tablespoonfuls of lukewarm water and three-fourths of a cupful of flour. Cover and let rise, then add one egg well beaten, the grated rind of a lemon, two tablespoonfuls of butter and enough flour to knead. Let rise again, roll to one-half inch thickness, shape with a small biscuit cutter, place in a buttered pan close together; let rise again and bake.

**Maryland Beaten Biscuits.**—Take one pint of flour, one-third of a cupful of lard, mix well and add salt and enough milk and water to make a stiff dough. Toss lightly on a floured board and beat with a rolling pin thirty minutes, folding and pounding the dough. Roll one-third of an inch in thickness, cut with a small cutter, prick with a fork and bake on a buttered tin twenty minutes in a hot oven.

**Plain Sponge Cake.**—Beat two eggs, separating the whites and yolks; add one-half cupful of sugar and the flavoring of a tablespoonful of lemon juice and a bit of the rind to the beaten yolks, add one-half cupful of flour and fold in the stiffly beaten whites, adding a pinch of salt. Bake in a moderate oven until it shrinks from the pan.

**Sponge Drops.**—Beat five egg yolks, add one cupful of sugar, beat again until the sugar is well dissolved, add a teaspoonful of lemon extract and fold in one cupful of flour; lastly add the beaten whites. Drop in gem pans and bake quickly.

Nellie Maxwell

# CHILDREN CRY FOR

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

### *School at Gettysburg Was Battle Hospital*

The building that housed the first classical school west of the Susquehanna river is still standing in Gettysburg, Pa., says the Baltimore Sun. The ivy-covered stone building, known as the Dobbin house, was erected in 1774 by Rev. Alexander Dobbin, a native of Ireland, who came to this country in 1773.

For more than thirty years, Mr. Dobbin conducted his school and many men, who later became prominent public citizens, were scholars. Early in the Nineteenth century the Dobbin school failed for some reason not recorded.

During the battle of Gettysburg the Dobbin house was used as an emergency field hospital, being at the edge of the fighting area. Men of both sides were cared for in the building. A spring of water in the basement was the mecca for hundreds of soldiers while the battle raged. Several families now occupy the property.

**Freshen a Heavy Skin**

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Advertisement.

### *Plenty of Style in Africa*

An American artist finds more well-dressed women in Algiers, northern Africa, than anywhere he has been since he left the States. The Algerians bob their hair, use little rouge, wear their skirts just below the knees and do not roll their stockings. Then by way of contrast a few miles away is the unspoiled oasis town of Bou Saada, which looks just as it did to Abraham. During his week's stay there the artist was the only English-speaking person in the place. . . . Why should this town be untouched by fashion and the other out-Paris Paris? Probably Algiers is more cosmopolitan.—Capper's Weekly.

Indigestion produces disagreeable and sometimes alarming symptoms. Wright's Indian Vegetable Pills remove symptoms and restore digestion. 372 Pearl St., N. Y. Adv.

### *Huh!*

### *Wives and Husbands*

In "Wives," by Gamaliel Bradford, the author discusses seven famous women made famous only by famous husbands. The women are Mrs. Abraham Lincoln, Mrs. Benedict Arnold, Theodosia Burr, Mrs. James Blaine, Mrs. Jefferson Davis, Mrs. Benjamin Butler, Mrs. James Madison. The author contends that each of these wives was the intellectual superior of her husband. What's the answer? Women prefer to submerge self in mate even if they can outshine him?

**Grandpa Roach's Story**

END the roach nuisance *now*. Flit will do it. Flit spray destroys roaches, bed bugs and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs.

**Kills All Household Insects**

Flit spray also clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.
